WORK EXPERIENCE

RaisisSoftware

City: Suceava | **Country**: Romania

[02/08/2022 – 06/10/2025] **Software developer (3 years 2 months)**

- I led the front-end development for a comprehensive ERP platform used by 5 clients. This system significantly helped companies organize their projects more effectively, improve team coordination, and simplify the creation and management of business documents such as offers and contracts.
- Supported the development of a CRM for an auto dealership, enhancing how sales teams interact with clients, manage offers, and track performance. The platform helped increase transparency, improve decision-making, and boost overall sales efficiency.
- Contributed to a customizable CRM platform that allowed businesses to adapt the system to their own workflows and processes. I also introduced and used AI-powered tools that increased team productivity and streamlined development workflows.
- Took part in building a Field Service Management (FSM) application, designed to help field workers and technicians manage daily tasks and interventions more efficiently. The platform improved real-time collaboration, reduced delays, and made field operations easier to coordinate.
- Worked on several SaaS products, focusing on creating user-friendly, scalable applications that transformed complex business needs into practical, accessible digital solutions.
- Across all projects, I emphasized collaboration, clarity, and long-term value, ensuring that every product made people's work easier, faster, and more organized.

Personal

City: Suceava | **Country**: Romania

[12/07/2022 – Current] **Personal and public projects**

- Built a personal [portfolio](#) website to showcase expertise in React, responsive design, animations, and modern web technologies, highlighting a strong sense of design, performance, and usability.
- Contributed to [saptarii.ro](#), a public platform, where I developed the majority of the backend. I also enhanced the administration interface on the frontend and implemented an interactive map using Leaflet, helping users easily explore and access locations associated with various purchased subscriptions.

EDUCATION AND TRAINING

[01/10/2024 – Current] **Master in Computer Science and Engineering**

"Stefan cel Mare" University of Suceava <https://usv.ro/>

Address: 13 Universității, 720229, Suceava, Romania |
