WORK EXPERIENCE

RaisisSoftware

City: Suceava | **Country:** Romania

[02/08/2022 – 06/10/2025]   **Software developer (3 years 2 months)**

- Led front-end efforts for a comprehensive ERP platform used by over 10 clients, helping teams streamline project planning, automate document & contract generation, and improve cross-department communication and efficiency.
- Supported a CRM for an auto dealership, improving how sales teams manage offers, customer interactions and vehicle inventory resulting in faster deal cycles and fewer errors.
- Helped grow a highly customizable CRM platform, enabling businesses to tailor fields, documents and workflows; introduced AI-assisted tools to speed delivery and remove repetitive work, improving the product experience for admins and end users.
- Contributed to a Field Service Management (FSM) app for technicians and field workers, increasing task visibility, real-time updates and coordination between field and office, which led to quicker interventions and better reporting.
- Worked across several SaaS products, focusing on reliable, intuitive user experiences and scalable front-end solutions that translate client needs into tools that make complex processes noticeably easier for users.
- Consistently prioritized collaboration, user-centric design and long-term value, ensuring delivered solutions genuinely helped people work more efficiently and with less friction.

Personal

City: Suceava | **Country:** Romania

[12/07/2022 – Current]   **Personal and public projects**

- Built a personal portfolio website to showcase expertise in React, responsive design, animations, and modern web technologies, highlighting a strong sense of design, performance, and usability.
- Contributed to saptarii.ro, a public platform, where I developed major parts of the backend, enhanced the administration interface on the frontend, and implemented an interactive map using Leaflet, helping users easily explore and access relevant weekly information.
