WORK EXPERIENCE

🏢 *RaisisSoftware* – Suceava, Romania

City: Suceava | **Country:** Romania

Software developer (3 years 3 months)

[02/08/2022 – 06/10/2025]

- I led front-end development for a comprehensive ERP platform used by five clients, helping companies organize projects more effectively, improve team coordination, manage invoices, provide P&L and cash flow reporting, and generate business documents such as offers and contracts from custom templates.
- Supported the development of a CRM for an auto dealership, enhancing how sales teams interact with clients, manage offers, and track performance. The platform helped increase transparency, improve decision-making, and boost overall sales efficiency.
- Contributed to a customizable CRM platform that allowed businesses to adapt the system to their own workflows and processes. I also introduced and used AI-powered tools that increased team productivity and streamlined development workflows.
- Took part in building a Field Service Management (FSM) application, designed to help field workers and technicians manage daily tasks and interventions more efficiently. The platform improved real-time collaboration, reduced delays, and made field operations easier to coordinate.
- Helped build several SaaS products, contributing to the creation of user-friendly and scalable applications that addressed real business needs. Across all projects, I focused on teamwork, clarity, and long-term value, ensuring that each product made work easier, faster, and more organized.

🏢 *Personal* – Suceava, Romania

City: Suceava | **Country:** Romania

Personal and public projects

[12/07/2022 – Current]

- Built a personal portfolio website to showcase expertise in React, responsive design, animations, and modern web technologies, highlighting a strong sense of design, performance, and usability.
- I served as the lead developer for the saptarii.ro project, providing the principal backend contribution while also steering frontend work. I led development of the administration interface, building core components, foundational logic and roughly half of the admin sections, and I implemented additional frontend features across the site. I also created an interactive Leaflet map that helps users discover and access locations tied to purchased subscriptions.

EDUCATION AND TRAINING

Master in Computer Science and Engineering

"Stefan cel Mare" University of Suceava [01/10/2024 – Current]

Address: 13 Universității, 720229 Suceava (Romania) | **Website:** https://usv.ro/
